

REQUIREMENTS TO OBTAIN A BUILDING PERMIT

1. Provide a site plan that includes the entire lot and accurately illustrates property lines, proposed pool or fence location, and any easements and existing structures.

2. Complete and submit a permit application with site drawing. (Permit applications can be obtained on-line or at the Community Development Department at City Hall).

NOTE: A permit cannot be issued until all adopted codes have been conformed with and an appropriate site drawing and permit application have been approved.

The main concerns with installing an above-ground swimming pool are Safety and Location, along with necessary permits.

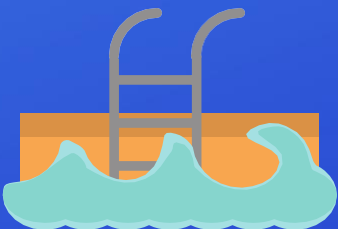

Below we have listed the requirements necessary for installing a swimming pool.

PERMITS:

-Are required for any permanently installed pool that is 2' or greater in depth.

-Are NOT required for any temporary/seasonal pool or in-ground pools under 2' feet.

-A fence is required that is a minimum of four (4) feet in height to provide safety for children too small to know the danger of drowning. The fence gate must be self-closing and self-latching. A fence permit must be obtained.

LOCATION:

-Electric overhead lines shall not be within ten (10) feet of the pool and the pool may not be placed over any buried electric lines.

Swimming pools must also meet setback requirements, which means five (5) feet from property lines, any other structures, and not placed over any easements. Pools cannot be in the front yard.

-Pools can be placed next to a deck. However, the door from the home going onto the deck has to be alarmed.

Don't forget to contact your insurance carrier for any requirements they might have concerning swimming pools or hot tubs.

Please contact our office for additional Information and permit application before setting up your pool.

SAFETY TIPS:

1. Never dive into above-ground pools, there are too shallow.
2. Fences and walls must be at least four (4) feet high and installed completely around the pool. Fence gates must be self-closing and self-latching. The latch should be out of a small child's reach. Gates should open outward.
3. If your house forms one side of the barrier to the pool, then doors leading from the house to the pool must be protected with alarms that produce a sound when a door is unexpectedly opened.
4. For above-ground pools, steps and ladders to the pool must be secured and locked or removed with the pool is not in use.
5. If a child is missing, always look in the pool first. Seconds count in preventing death or disability.
6. Keep rescue equipment by the pool and be sure a portable phone is poolside with emergency numbers posted. Knowing cardiopulmonary resuscitation (CPR) can be a lifesaver.

Parents and guardians: Only you can prevent a drowning. Watch your child closely at all times. Make sure doors leading to the pool area are closed and locked. Young children can quickly slip away and into the pool.
